

A close-up photograph of several ripe, golden-brown onions growing in a garden bed. The onions are partially covered by dark, rich soil. Green onion stalks are visible, some in sharp focus and others blurred in the foreground and background. Small green weeds are scattered around the base of the onions.

# Tradition Meets Modernity: tegut in Weimar

The new tegut location in Weimar offers a **unique shopping experience** set against the impressive backdrop of a historic former slaughterhouse from the 19th century, which is now a listed building.

Developed by Interstore and brought to life by Schweitzer, the project combines historic architecture with the requirements of a **modern local grocery store**. The original facade of the restored hall has been largely preserved, while the store design inside purposefully emphasizes elements that respectfully integrate the building's history.

On a sales area of 12,916 ft<sup>2</sup>, **modern refrigeration units** and **flexible stainless steel furniture** have been integrated into the fresh food sections, blending functionality and aesthetics.

The result of this collaboration is a unique place where tradition and modernity harmoniously merge.

## CLIENT

tegut... gute Lebensmittel GmbH & Co. Kg

## LOCATION

Weimar, Germany

## TOTAL AREA

12,916 ft<sup>2</sup>

## COMPLETION

April 3rd, 2025

## CATEGORY

Retail, Food, Supermarket

## SCOPE OF WORK

DESIGN + BUILD

Refrigeration Cases

# DESIGN BUILD

Our unique retail approach:

**Design + Build, all from ONE source.**

In close co-operation with our customers, we turn their vision into reality.

## BENEFITS

- From the idea to realization, everything from a single source
- Guaranteed adherence to schedule + budget
- Flexibility + speed in realization

# REFRIGERATION CASES

Almost half the electricity consumption in supermarkets is due to refrigeration. With our **energy efficient** refrigerated cabinets, counters and refrigeration systems from our own production, retailers make **savings on energy costs**.

## BENEFITS

- No need for a refrigeration plant
- Possibility of connection to a waterloop system
- Simple pipework and maintenance
- Expansion options, no interruption during conversion
- Massive reduction in construction times for quick conversions and possible rollouts
